Note:

- [1] Table shows the number and share of prescriptions for which prescribers had a prior fill at the same store in the Sample Walmart Dispensing Data and in the Full Walmart Dispensing Data.
- [2] A prior fill is defined as having previously filled a prescription at an earlier date. A prior prescription is identified using the fill_date variable in the Sample Walmart Dispensing Data as well as in the Full Walmart Dispensing Data.
- [3] Total share is out of 1,800 total prescriptions in the Sample Walmart Dispensing Data and 49,243 flagged prescriptions in the Full Walmart Dispensing Data. Prescriptions with missing values for presc_id were not included in the numerator but were included in the denominator.
- [4] Flagged prescriptions are those that are flagged by at least one of McCann's Red Flags.
